

## List of Relevant Authorities

The below table sets out the Institute and Faculty's of Actuaries (**IFoA**'s) non-exhaustive list of Relevant Authorities for the purposes of section 2.2.2 of Actuarial Profession Standard (**APS**) X1.

'Relevant Authority' is defined in APS X1 as "an IAA [International Actuarial Association] Full Member Association (as defined by the IAA) or other regulatory entity with equivalent authority to impose standards in relation to actuarial work (for the avoidance of doubt this does not include the IAA or the Actuarial Association of Europe)".

Section 2.1 of APS X1 provides that: "Members should ensure that their Actuarial Work is carried out in a way that is substantially consistent with ISAP1 [International Standard of Actuarial Practice 1]". Section 2.2.2 provides that Members will be deemed to have met the requirements of section 2.1 if they are "Applying the Recognised Standards of a Relevant Authority included in a non-exhaustive list of such Relevant Authorities as may be published from time to time by the IFoA".

The below table reflects Relevant Authorities that have confirmed to the IFoA that (1) they have in place a body of standards that are substantially consistent with ISAP1 and (2) they are content to be included in the list. The IFoA does not assume any responsibility for those standards. This table will be updated from time to time.
